Sent via electronic mail to 42734-09992101@requests.muckrock.com

Re: **Open Records Act request, OAG internal number 17 ORA 119.**

Dear Mr. Kasper:

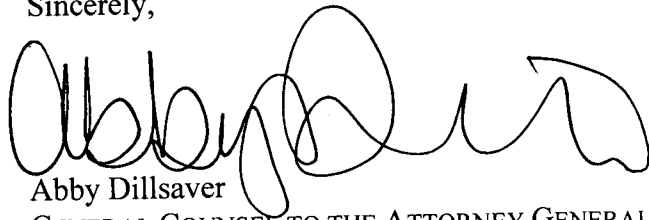

This letter is to acknowledge your Open Records Act request in which you seek the following information:

All internal and external email correspondence, including attachments, of Attorney General Mike Hunter, Dawn Cash, and staff in the Public Utilities Unit, regarding the joint project of Public Service Company of Oklahoma and Southwestern Electric Power Company called the Wind Catcher Project, also referred to as the Wind Catcher Energy Connection.

We have reviewed our records in accordance with your request and have determined that the enclosed documents are responsive to your request and not subject to an exemption under the Oklahoma Open Records Act. Additional documents are not produced as they have been determined to be exempt from disclosure under the Act. 51 O.S.Supp.2017, § 24A.12.

So we may verify you received the records, please sign the attached receipt and return it to me. This response completes your Open Records Act request to the Oklahoma Attorney General's Office and closes your file.

Sincerely,

A handwritten signature in black ink, appearing to read 'Abby Dillsaver', with a large, stylized flourish at the end.

Abby Dillsaver
GENERAL COUNSEL TO THE ATTORNEY GENERAL

\$4.5 Billion Invested to Build Largest U.S. Wind Farm in OK

The largest single wind farm in the United States will soon be located in Oklahoma. On Wednesday, Invenergy, GE Renewable Energy, EPCO and Tulsa-based PSO announced a \$4.5 billion investment in the Wind Catcher Energy Connection wind farm. The wind farm is being built in the Oklahoma panhandle, with a 350-mile dedicated line to run the power to Tulsa for distribution across a multi-state region.

project is one of the biggest single purchases of renewable energy by a utility company.

Wind Catcher project is expected to support 4,000 direct and 4,400 indirect jobs annually during construction and 80 permanent jobs complete. Estimated property tax contributions are \$300 million over the life of the project. [Click here](#) to read more.

Regulating Farm Ponds & Puddles

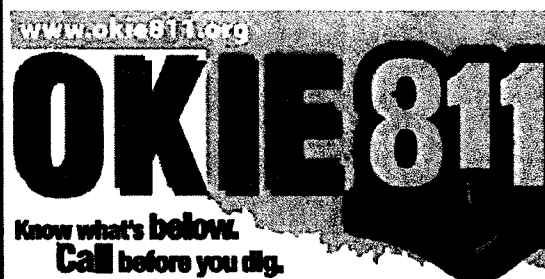

On Thursday, the EPA published a proposed rule to withdraw the 2015 "Waters of the U.S." (WOTUS) rule that increased the regulatory reach of the federal government to include farm ponds and puddles. By publishing the new proposed rule, the EPA and the Corps of Engineers are opening the rule to public comment for a period of 30 days. Current efforts are underway to increase the comment period, but EPA Administrator Scott Pruitt has stated that he would like to finish the comment period and publish a revised rule by the end of the year. [Click here](#) for a breakdown of the timeline and the court battles facing the WOTUS rules.

How States Raise Their Tax Revenue

The Pew Charitable Trusts recently analyzed how various states, including Oklahoma, gather their tax dollars. Among the 41 states that collect broad-based personal income taxes, those taxes are the largest source of tax revenue in 28 states. In 17 of the 45 states that impose general sales tax, it constitutes the primary source of tax revenue. The state depending most heavily on general sales tax is Texas, at 61.6%. By contrast, Oklahoma's general sales tax is 29.1%, just slightly below the national average of 31.6%. Other sources of tax revenue in Oklahoma include personal income (35.3%), selective sales (15.4%), licenses (2.2%), corporate income (3.9%) and severance (3.9%). [Click here](#) to see how these percentages compare with other states and the national average.

We Mean Business

Subject: CEO Briefing: Cigarette Fee Ruled Unconstitutional

Having trouble viewing this email? [Click here.](#)

Oklahoma Supreme Court Overturns Cigarette Fee

This week, the Supreme Court ruled the \$1.50 cigarette fee approved by the Legislature (Senate Bill 845) unconstitutional. A group of cigarette manufacturers, wholesalers and consumers of cigarettes challenged SB 845, alleging it was a "revenue raising measure" that violated the Constitutional provisions of State Question 640.

Passed by voters in 1992, State Question 640 restricts the Legislature's ability to enact "revenue raising" measures by requiring such measures to originate in the House, be enacted before the last five days of session, and be approved by a three chambers. Despite the state's argument that the revenue generated by the cigarette fee was incidental to its purpose of reducing smoking, the Supreme Court found SB 845 to be a revenue raising measure. Since SB 845 originated in the Senate, was passed on the last day of

session and only received a simple majority of votes in each legislative chamber, it was deemed to be in violation of SQ 640.

The decision means that \$215 million earmarked for the Department of Health, the Department of Mental Health and Substance Abuse Services and the Department of Human Services will no longer be available. Legislative leaders are discussing next steps, which could include a special session.

Winners of Tuesday's Special Primary Elections

Special primary elections were held Tuesday in Senate District 45 and House District 76. Both districts had winner-take-all Republican and Democrat primaries, setting up special general elections on November 14. In Senate District 45, which contains parts of South Oklahoma City and Mustang, Republican Paul Rosino defeated six other Republicans with 33% of the vote as Democrat Steven Vincent handily won the Democratic primary with 92% of the vote. In Broken Arrow's House District 76, Republican Ross Ford defeated four other Republicans with 31% of the vote and Democrat Chris VanLandingham defeated one challenger with 54% of the vote.

Collaborative Robots & The Future of Work

The Wall Street Journal reports that our workforce could soon get a helping hand from technology. "Known as 'collaborative' robots, they are small and relatively cheap - costing tens of thousands of dollars - compared with miles of conveyor belts and automation systems that run into the tens of millions. The new robots are designed with the majority of warehouses world-wide in mind, where orders continue to be fulfilled manually by people pushing carts up and down aisles." Rather than replace manpower, these robots work alongside existing workers to help boost productivity.

Experimental Learning & Public Health

This past week, the Oklahoma State Regents for Higher Education and the Oklahoma State Department of Health (OSDH) signed a memorandum of understanding. The agreement will provide experimental learning opportunities for college students and serve as a workforce resource tool for OSDH. Students in the program will receive higher education course credit while obtaining OSDH job experience and earning an income. The partnership reduces financial barriers to graduation while improving career prospects.

"The State Regents and the Oklahoma State Department of Health share a mutual interest in improving educational opportunities and helping to better prepare students to meet Oklahoma's workforce demands," said Chancellor Glen D. Johnson. "The State Regents are proud to formalize this partnership agreement to facilitate hands-on learning experiences in public health." [Read more.](#)

Subject: Correction: CEO Briefing Cigarette Fee Ruled Unconstitutional

Having trouble viewing this email? [Click here.](#)

Oklahoma Supreme Court Overturns Cigarette Fee

Correction: The previous version of this article incorrectly listed the Department of Health as one of the agencies that would have received funds from the cigarette fee. The three agencies that would have received the funds are the Oklahoma Health Care Authority, the Department of Mental Health and Substance Abuse Services and the Department of Human Services.

This week, the Supreme Court ruled the \$1.50 cigarette fee approved by the Legislature (Senate Bill 845) unconstitutional. A group of

cigarette manufacturers, wholesalers and consumers of cigarettes challenged SB 845, alleging it was a "revenue raising measure" that violated the Constitutional provisions of State Question 640.

Passed by voters in 1992, State Question 640 restricts the Legislature's ability to enact "revenue raising" measures by requiring such measures to originate in the House, be enacted before the last five days of session, and be approved by a three chambers. Despite the state's argument that the revenue generated by the cigarette fee was incidental to its purpose of reducing smoking, the Supreme Court found SB 845 to be a revenue raising measure. Since SB 845 originated in the Senate, was passed on the last day of session and only received a simple majority of votes in each legislative chamber, it was deemed to be in violation of SQ 640.

The decision means that \$215 million earmarked for the Oklahoma Health Care Authority, the Department of Mental Health and Substance Abuse Services and the Department of Human Services will no longer be available. Legislative leaders are discussing next steps, which could include a special session.

The agreement will provide experimental learning opportunities for college students and serve as a workforce resource tool for OSDH. Students in the program will receive higher education course credit while obtaining OSDH job experience and earning an income. The partnership reduces financial barriers to graduation while improving career prospects.

"The State Regents and the Oklahoma State Department of Health share a mutual interest in improving educational opportunities and helping to better

prepare students to meet Oklahoma's workforce demands," said Chancellor Glen D. Johnson. "The State Regents are proud to formalize this partnership agreement to facilitate hands-on learning experiences in public health." [Read more.](#)

Subject: Correction: CEO Briefing Cigarette Fee Ruled Unconstitutional

Having trouble viewing this email? [Click here.](#)

Oklahoma Supreme Court Overturns Cigarette Fee

Correction: The previous version of this article incorrectly listed the Department of Health as one of the agencies that would have received funds from the cigarette fee. The three agencies that would have received the funds are the Oklahoma Health Care Authority, the Department of Mental Health and Substance Abuse Services and the Department of Human Services.

This week, the Supreme Court ruled the \$1.50 cigarette fee approved by the Legislature (Senate Bill 845) unconstitutional. A group of

cigarette manufacturers, wholesalers and consumers of cigarettes challenged SB 845, alleging it was a "revenue raising measure" that violated the Constitutional provisions of State Question 640.

Passed by voters in 1992, State Question 640 restricts the Legislature's ability to enact "revenue raising" measures by requiring such measures to originate in the House, be enacted before the last five days of session, and be approved by a three chambers. Despite the state's argument that the revenue generated by the cigarette fee was incidental to its purpose of reducing smoking, the Supreme Court found SB 845 to be a revenue raising measure. Since SB 845 originated in the Senate, was passed on the last day of session and only received a simple majority of votes in each legislative chamber, it was deemed to be in violation of SQ 640.

The decision means that \$215 million earmarked for the Oklahoma Health Care Authority, the Department of Mental Health and Substance Abuse Services and the Department of Human Services will no longer be available. Legislative leaders are discussing next steps, which could include a special session.

Primary Visio

Primary Vision Care Services, Inc. (PVCS), is an Oklahoma incorporated, vision care benefit company, founded in 1993 by a practicing Oklahoma Optometrist, Dr. Richard S. Swales. PVCS is headquartered in Lawton, where it operates and conducts its administrative, business development, customer service, and information technology functions. PVCS offers a comprehensive vision plan that provides outstanding benefits, a large network of 350+ Oklahoma independent eye care doctors, unlimited eye exams with no copayment, both eyeglasses, contact lens and lens options provided at wholesale cost, and very affordable plan rates. PVCS provides plans that serve employer groups as well as individually enrolled members and will work directly or through your benefit consultant. The company currently has over 18,000 members mostly in Oklahoma and surrounding states. The PVCS plan is recognized as a Direct Care Plan by the Oklahoma Insurance Department.

Special primary elections were held Tuesday in Senate District 45 and House District 76. Both districts had winner-take-all Republican and Democrat primaries, setting up special general elections on November 14. In Senate District 45, which contains parts of South Oklahoma City and Mustang, Republican Paul Rosino defeated six other Republicans with 33% of the vote as Democrat Steven Vincent handily won the Democratic primary with 92% of the vote. In Broken Arrow's House District 76, Republican Ross Ford defeated four other Republicans with 31% of the vote and Democrat Chris VanLandingham defeated one challenger with 54% of the vote.

Collaborative Robots & The Future of Work

The Wall Street Journal reports that our workforce could soon get a helping hand from technology. "Known as 'collaborative' robots, they are small and relatively cheap -costing tens of thousands of dollars - compared with miles of conveyor belts and automation systems that run into the tens of millions. The new robots are designed with the majority of warehouses world-wide in mind, where orders continue to be fulfilled manually by people pushing carts up and down aisles." Rather than replace manpower, these robots work alongside existing workers to help boost productivity.

August 18, 2017

Governor Fallin Says Special Session Is Necessary

Wednesday, Governor Fallin stated that the Legislature needs to return to the Capitol to deal with the \$215 million budget shortfall created by the proposed smoking cessation fee recently overturned by Oklahoma's Supreme Court.

money can be spent from any state fund unless the Legislature specifically appropriates it," said Fallin. "Let's be clear. The director of the Office of Management and Enterprise Services (OMES) does not have the authority to transfer monies to the affected agencies from other sources without legislation directing him to do so." The Oklahoma Health Care Authority, the Department of Mental Health and Substance Abuse Services and the Department of Human Services were the three agencies slated to receive most of the funding from the proposed fee.

Special session is the best option," the Governor said. "Failure to meet in special session would mean \$215 million would be cut mostly from these three state agencies. These agencies and the people they serve cannot sustain the kind of cuts that will occur if we do not find a solution." Read more [here](#).

Aviation & Aerospace: State's Second Largest Industry

A newly released study confirms that the aviation & aerospace industry is the second largest economic driver in the state. The industry generates nearly \$44 billion in annual economic activity in Oklahoma, supporting 206,000 quality jobs that pay an average salary of \$73,000. On Monday, Governor Fallin shared highlights from the Aviation & Aerospace Economic Impact Study, noting that "the footprint of aviation and aerospace in our state has grown dramatically - 250 percent - in the more than 20 years since our last study." [Click here](#) to read more about the study coordinated by the Oklahoma Aeronautics Commission.

Give Input on Oklahoma's Occupational Licensing

To ensure Oklahoma licensing requirements are appropriate, the Governor has established an [Occupational Licensing Task Force](#) in December 2016. The task force is holding a public meeting at the Capitol on August 23 to gather input and discuss how occupational licensing affects military families, low-income individuals and our criminal justice system.

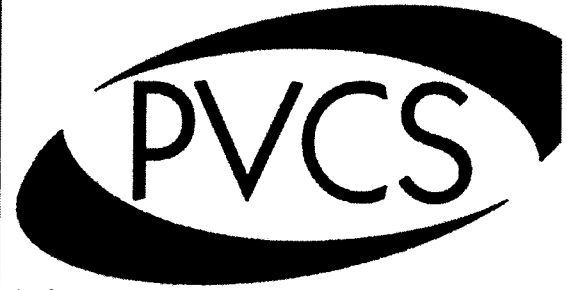

The Task Force members have been meeting diligently to examine how Oklahoma can achieve a balance between maintaining free market principles, protecting public safety, and reducing barriers to escape poverty," said Labor Commissioner Melissa Houston. Task force recommendations will be released in December 2018. To speak at the meeting or learn more, contact okforce@labor.ok.gov before August 21.

State Chamber Leads Nation in Membership Growth

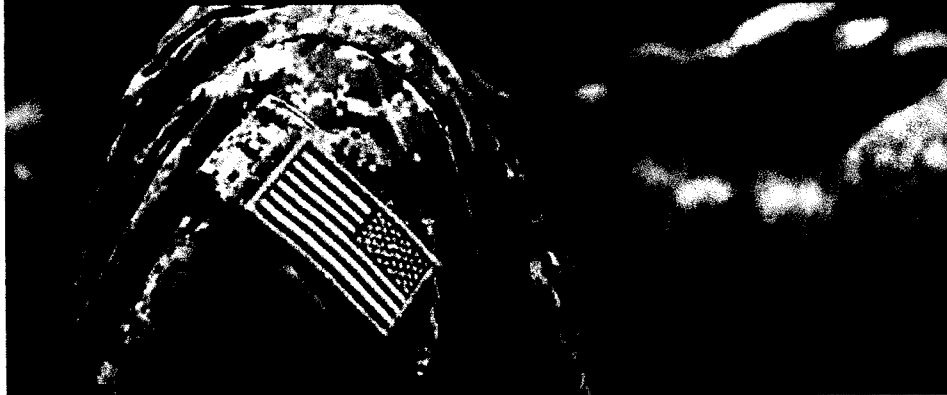

Oklahoma companies understand the value of chambers in growing and protecting their business. The State Chamber of Oklahoma received top national honors at the Association of State Chamber Professionals conference in Honolulu on Tuesday. Stephanie Snyder, President of Membership at the State Chamber of Oklahoma, was presented with two awards for highest membership growth in members and highest membership growth in dollars.

Receiving national recognition from our industry peers is always an honor," said Fred Morgan, President and CEO. "Our membership team works tirelessly to recruit new companies into the State Chamber with the support of our entire staff remaining engaged and dedicated to the members we serve." Learn more about the [benefits of State Chamber membership](#) and [how we fight for your business at the State Capitol](#)

Expanded Education Benefits for Veterans

Recently signed by President Trump, the "Forever G.I. Bill" will expand veterans' access to educational benefits. The new law will make significant changes to veteran benefits including eliminating a 15-year limit for degree or certificate completion, making all Purple Heart recipients (since 9/11) eligible and restoring benefits to veterans whose colleges shut down in the middle of the semester.

Created during World War II, the G.I. Bill has been updated several times to assist veterans with paying for college and training. The bill was last expanded eight years ago under the post-9/11 Veterans Educational Assistance Act. Click [here](#) to read more about the bill.

Primary Vision Care Service

Primary Vision Care Services, Inc. (PVCS), is a Oklahoma incorporated, vision care benefit company, founded in 1993 by a practicing Oklahoma Optometrist, Dr. Richard S. Swales. PVCS is headquartered in Lawton, where it operates and conducts its administrative, business development, customer service, and information technology functions. PVCS offers a comprehensive vision plan that provides outstanding benefits, a large network of 350+ Oklahoma independent eye care doctors, unlimited eye exams with no copayment, both eyeglasses, contact lens and lens options provided at wholesale cost, and very affordable plan rates. PVCS provides plans that serve employer groups as well as individually enrolled members and will work directly or through your benefit consultant. The company currently has over 18,000 members mostly in Oklahoma and surrounding states. The PVCS plan is recognized as a Direct Care Plan by the Oklahoma Insurance Department.

Higher education is listening to what skills business needs out of its future and current employees.

The Oklahoma State University Spears School of Business will be adjusting their course curriculum beginning this school year. OSU recently conducted a review of the undergraduate program, asking employers, alumni and students to give input on the program's strengths and weaknesses. Many respondents identified communication skills, data know-how and critical thinking as areas needing improvement. The new curriculum will give additional emphasis to these crucial workforce competencies.

The University of Central Oklahoma also has created a Workforce Advantage program that offers curriculum and training for today's professional in the workplace. The program provides tools to help students develop qualities that employers value including problem-solving skills, professionalism and effective communication. For more information on the program, [click here](#).

Preapproval Case for \$4.5B Wind Farm to Proceed

Thursday, Corporation Commission Administrative Law Judge Mary Candler ruled that a preapproval case for Public Service Company of Oklahoma's (PSO) Wind Catcher project can continue moving forward. Oklahoma Attorney General Mike Hunter had made a motion to dismiss the case, but was denied. Through this case, PSO seeks preapproval to recover costs from customers once it's in service. Upon completion, the 2,000-megawatt Wind Catcher facility, located in the Oklahoma panhandle, will be the largest wind farm in the United States. Tulsa-based PSO anticipates that Wind Catcher will save customers more than \$2 billion over the project's lifespan. PSO has requested a ruling on the case by March 31.

Aug. 30 - Xcel to shut 2 coal plants; US offshore wind needs policy support

AUG. 30, 2017

VIEW ONLINE | SIGN UP | FORWARD

BROUGHT TO YOU BY - Utility Dive Brand Studio

Utility Innovation & Transformation

Are you keeping up with the evolving needs of your utility customers? Don't miss this opportunity to gain insight into the changing utility customer experience. Join us for a LIVE discussion Thursday, Sept 14th.

[Learn more](#)

NOTE FROM THE EDITOR

Not tired of the Department of Energy's grid study yet? Good, because Utility Dive is bringing more analysis in a series of op-eds from top power sector thought leaders.

The series will run through next week, and our contributors run the gamut of clean energy groups, former FERC commissioners and free-market think tanks. To kick off our series, we have [a piece](#) from Energy Innovation, highlighting ways the study could be used to boost grid flexibility.

Please send us your tips, quips and insight to the links below. As always, thank you for reading Utility Dive.

Krysti Shallenberger
Associate Editor, Utility Dive

TOP NEWS

Xcel Energy proposes shuttering 2 Colorado coal plants

The agreement, reached with about a dozen stakeholders, could also lead to \$2.5 billion in clean energy investments in rural Colorado.

Policymaker support key to offshore wind prospects in US

FEATURE STORY

A Department of Energy report found the resource could cost-effectively deliver twice the nation's electricity needs, but experts say it needs the right policy support.

Illinois nuclear subsidies unlawful, EPSCA, generators tell appellate court

A brief filed with the U.S. Court of Appeals for the 7th Circuit alleges that the ZEC program is preempted by the Federal Power Act and violates the Commerce Clause of the U.S. Constitution.

How to overcome customer resistance to efficiency project implementation

SPONSORED CONTENT BY WAYPOINT BUILDING GROUP

No utility likes to see its customers fall short of completing an efficiency project. Counter that with these strategies.

Resilience or flexibility? DOE's grid report lays bare the struggle between past and future

OPINION POST

Energy Innovation's Mike O'Boyle analyzes how the DOE grid study's recommendations could help flexibility.

Rocky Mountain Power, Utah solar advocates reach net metering settlement

Current net metering customers will be grandfathered through 2035. After Nov. 15, new customers will receive export credits of \$0.092/kWh during a three-year period until new rates are established.

Socal Edison resolves San Onofre fuel storage lawsuit in settlement

Possible storage locations include the Palo Verde Nuclear plant in Arizona, but plant operator Arizona Public Service Co. said it will not take San Onofre's waste.

Sunrun, Comcast team up to market residential solar systems

Comcast plans to begin marketing the solar company's services to its customers on a selective basis later this year.

Arkansas launches RFP for efficiency program contractor

The Arkansas Energy Office is soliciting program designs and a primary contractor to develop an energy efficiency financing program.

If nuclear is not in the future US energy mix, what will replace it?

FEATURE STORY

Cost overruns and construction delays make new nuclear an unattractive option, but the fleet is aging and the alternatives that could fill nuclear's role in a low carbon power system are limited.
